

# 09/23 Expert communication

<b>Communication channel</b>	Wechat
<b>Date</b>	09/23
<b>Time</b>	19:00PM-22:00PM
<b>Attendees</b>	All team John Xu (expert)

## Agenda

1. Is it possible to remove the whole cooling system? The whole cooling system requires a whole shipping container. If we can replace the whole cooling system by a simple fan or remove it, we can put the whole rendering system into one container.

## Notes

1. It is possible to remove the cooling system if the standard permit to directly let steam into the air.
2. There will be safety concerns. The steam will be condensed into water. Water drops on the machine will cause electricity safety concerns.
3. Another use of the whole cooling system is it can be used to control the temperature by adjusting the vacuum pump.

## Action Items

<b>Action item</b>	<b>Owner</b>	<b>Deadline</b>
Keep the whole cooling system	All team	09/23
